Business Category : Bakery and Confectionery
Business Location : Bhagwan Adhinath Marg , Kaiser Ganj Rd, nr. State Bank of India , Ajmer, Rajasthan 305001
Client Type : Local business

Client Questions & Proposed Solutions

Online presence

Question 1: How can customers easily find information about Delux Bakery online?
Solution: We created a website that introduces the bakery and provides important information in one place, helping customers learn about the business without visiting the shop first.

Product information

Question 2: How can customers learn about the bakery's products before visiting the store?
Solution: We designed a dedicated Products page to display bakery items with photographs and prices where verified information is available. This helps customers explore the available products more conveniently.

Contact information

Question 3: How can customers easily find the bakery's contact details and location?
Solution: We included a Contact page with relevant contact information, the bakery's location, and a map where available. This makes it easier for customers to find the shop and get in touch.

Customer experience

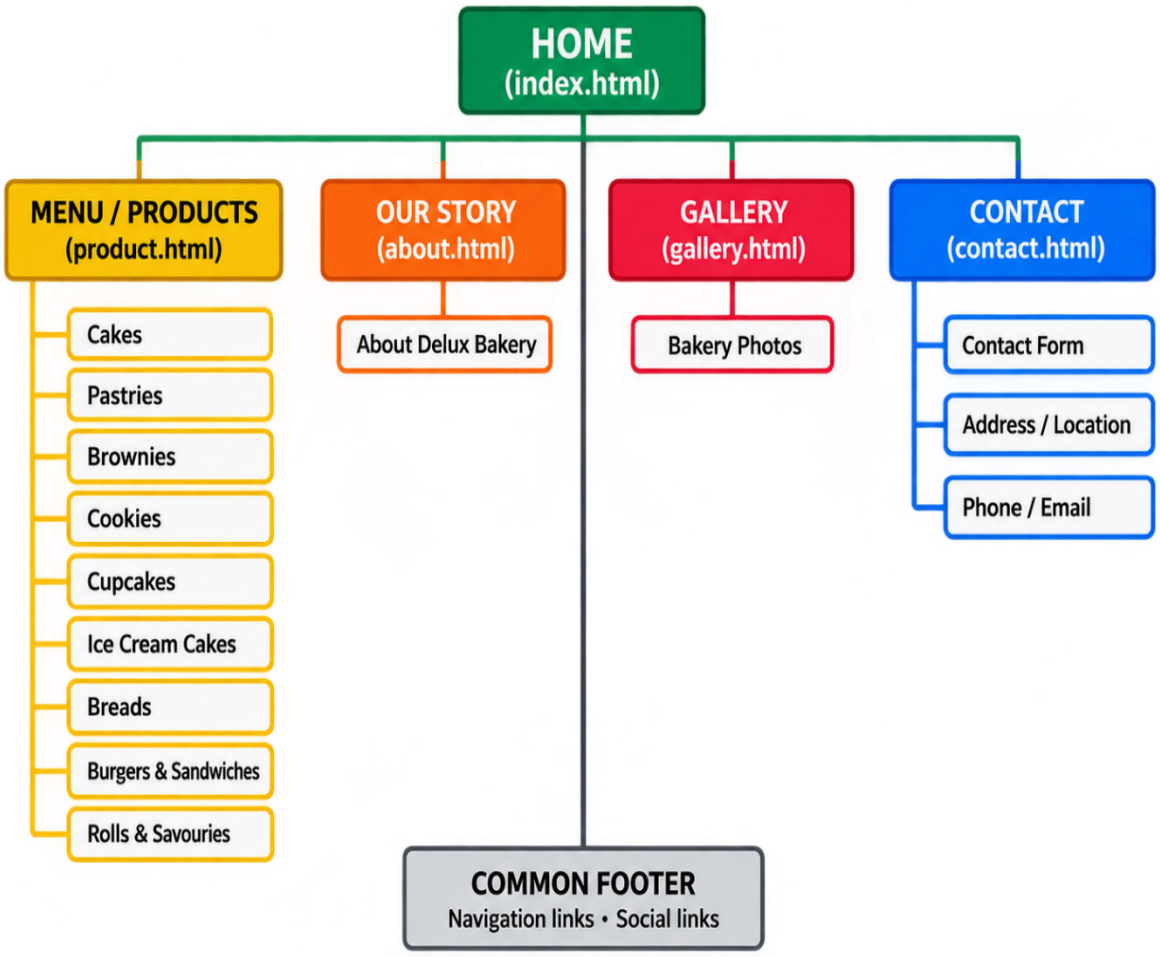

Question 4: How can the bakery's website be made easy to use on both mobile phones and computers?

Solution: We used HTML and CSS to create a clear layout and responsive design, helping the website adapt to different screen sizes and making information easier to access.

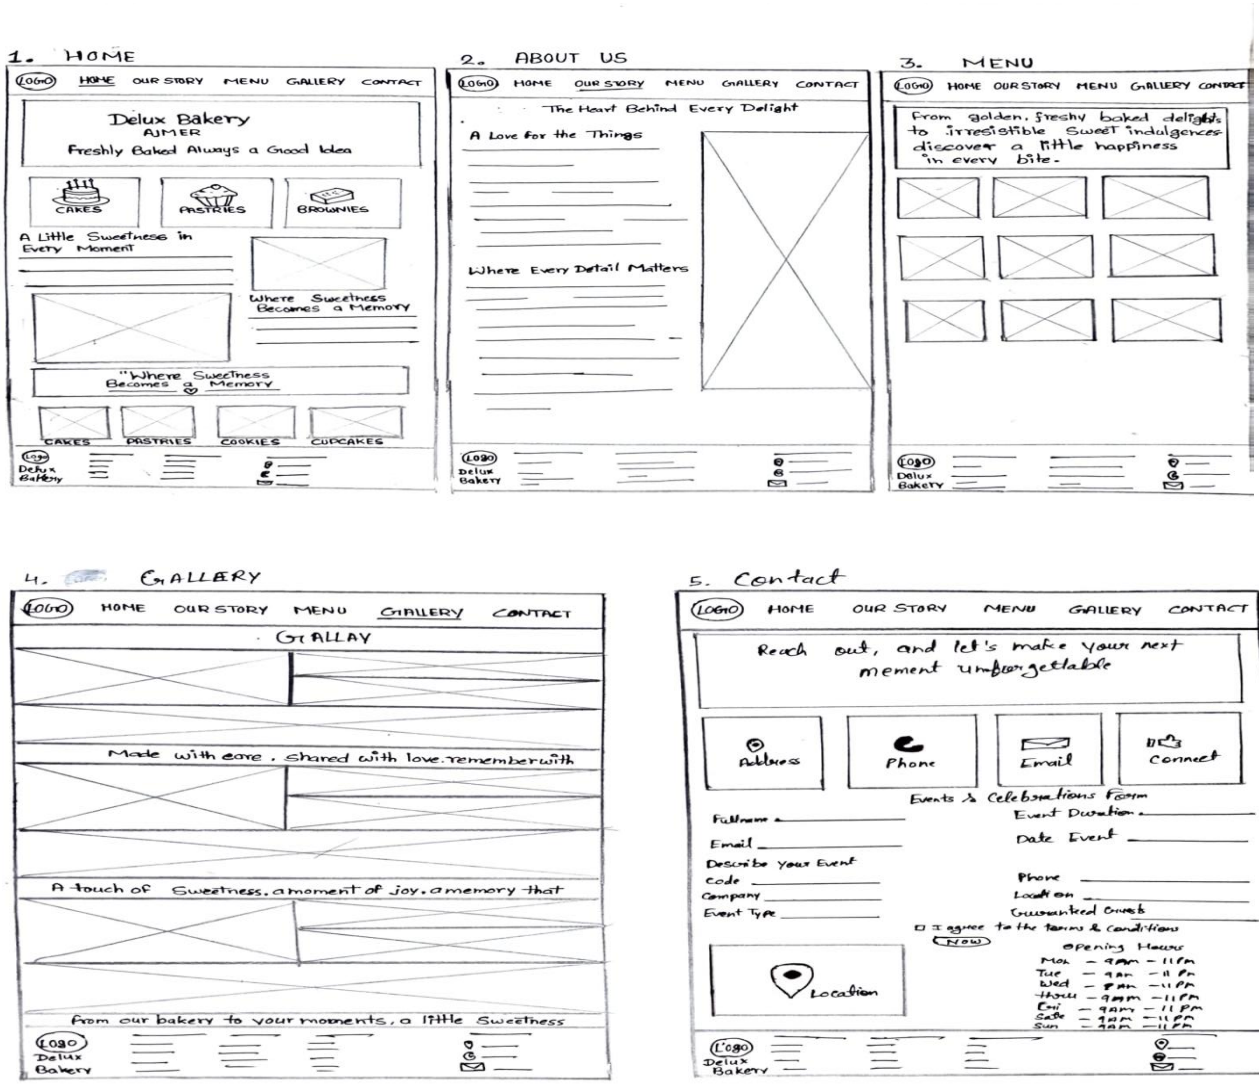

Business visibility

Question 5: How can Delux Bakery present its products and brand more attractively to potential customers?
Solution: We designed a visually appealing homepage using bakery photographs, a consistent colour palette, and clear navigation. This helps present the bakery professionally and strengthens its online presence.

Site-Map

Wire-Frame

Typography Selection & Rationale

Playfair Display — Headings
An elegant, classic serif font used for main headings, section titles, and product categories to create a premium bakery identity.
Lato — Body Text
A clean, modern font used for paragraphs, navigation, buttons, and product descriptions to ensure readability.
Overall Rationale
The combination of Playfair Display and Lato balances elegance with clarity, complementing Delux Bakery's espresso-brown, cream, and antique-gold colour palette.

Color Palette

1.Dark Cocoa — #1A100D

Used for the navigation bar, footer, and important elements to create depth contrast, and a premium identity.

2.Chocolate Brown — #38231B

Used for secondary elements to create warmth and maintain a rich, consistent bakery theme.

3. Cocoa — #74503A

Used for accents and supporting details to complement the darker shades and reflect the natural tones of baked products.

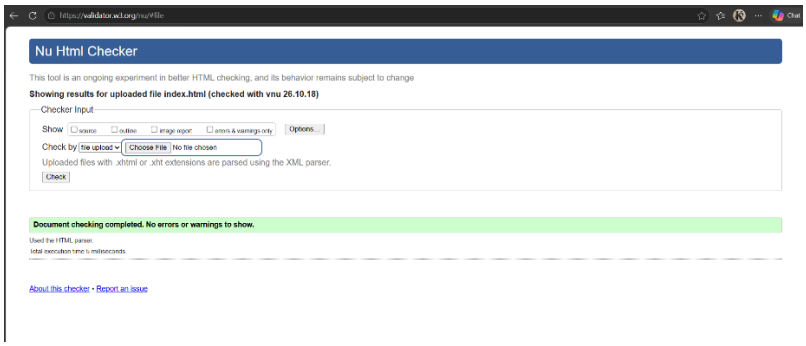

4. Antique Gold — #C6A46A

Used for highlights and decorative accents to add elegance and a luxurious touch.

5. Cream — #F0E1CA

Used for backgrounds and light sections to create a soft, inviting appearance and improve readability.
